The digital version of the magazine SVĚTLO

In the digital age the digital version of the magazine is essential appreciation and extension of its printed edition. The digital approach facilitates accessibility of information and increases the comfort of their acquisition.

The occasion to read technical magazines through digital technology enhances the cultivation of professional knowledgeability and has a positive impact on terminology acquiring. Large attention given to our websites is supported by first-hand information as well as by:

- digital interactive cumulative registers of articles,
- thematic specials created from articles of serials published in our magazines.

- Displays visually the same pages as in a printed magazine, including advertising
- Active links (clicks) on the pages lead directly to the website containing the advertised information
- Presentation can be expanded with multimedia features (e.g. video)
- Small changes compared to the printed version are possible

Zero page

- Exposed advertising space 430 × 600 px next to the title page – when the magazine is closed
- The opportunity to present special offers
- The ability to place multimedia feature
- Blurb on the article/advert within the current issue; and direct click leading to the current or any other issue of the magazine, or to the website according to the advertiser's choice
